DETAILED ACTION

1. This action is in response to applicant's response filed on Sep. 27, 2006. **Claims 1-18** are pending in the present application.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Independent claim 10 recites a subscriber line driver apparatus and limitations for the following: "a first pair of current drivers coupled to an impedance bridge including a first impedance Z1 and a second impedance Z2 coupled to a subscriber line for driving a voice signal in a first frequency range on to the subscriber line through Z1 and Z2 respectively; and a second pair of current drivers coupled to the impedance bridge for driving a data signal in a second frequency range onto the subscriber line, wherein within the first frequency range an output impedance across the subscriber line is controlled by an impedance synthesis circuit, wherein within the second frequency range the output impedance is substantially $Z1+Z2$ ". The prior art of record does not teach these limitations.

New search updates reveal no other prior art which teaches the limitations in the context of the claim. Therefore, claim 10 is indicated allowable. Claim 1 is essentially similar to claim 10 and is indicated allowable. Claims 2-9 being dependent from claim 1 and claims 11-18 being dependent from claim 10 are also indicated allowable.
